- Observation
- Decision making
- Communication
- Multi-tasking

Other interests

- Calisthenics, Gym, Basketball
- Reading
- Chess, Photography...

Summary

Recent graduate with a Bachelor's degree in Artificial Intelligence and Data Science, currently pursuing the ALX Program in Software Engineering. Eager to leverage my solid foundation in programming, data analysis, and machine learning while expanding my skill set as a front end developer. Seeking opportunities as a Junior Data Scientist or a Front-End Developer to contribute to innovative projects and gain valuable hands-on experience.

Professional Experience

Bein Mobi | React developer

Meknes, June → Ongoing

- Contributing to the design and development of an innovative app builder feature within the Mobioptions platform.
- Developing responsive and user-friendly front-end interfaces using modern web technologies such as HTML5, CSS3, TailWind and ReactJs

3D SMART FACTORY intern

Mohammedia, April → June 2023

- Engaged in a comprehensive internship program focused on Natural Language Processing (NLP) and Deep Learning techniques.
- Attained a solid grasp of NLP concepts, including text preprocessing, sentiment analysis, named entity recognition, and text classification.
- Collaborated closely with mentors and fellow interns, actively participating in brainstorming sessions and knowledge sharing.
- Collaborated and developed The **Jobeemaroc** CV matching application and job recommender system

Rappidia Agency | Web & Mobile developer

Meknes, April → June 2022

- Collaborated in development of a food delivery App using Flutter Framework,

Barid Media | Web developer (internship observation)

Casa, June → August 2021

- Developed a delivery note management web app, speeding the process of managing, creating, editing, searching and storing delivery notes by date, using technologies: HTML, CSS, Bootstrap, PHP and MySQL
